

NGUYỄN THIÊN

ROBLOX GAME DEVELOPER · STUDIO FOUNDER

Roblox developer since 2019 and founder of **Aerospace Studio**. I created **Attack on Titan: Wings of Freedom** (146K+ visits) and **AOT: Aerospace** (47K+ visits, 80% likes), with 740+ members across my Roblox communities. I build combat systems in Luau (ODM gear movement, abilities, round-based multiplayer, crate economies, VFX) and use Claude, ChatGPT and Claude Code daily, reviewing and testing every line of AI-generated code. Final-year Software Engineering student at VKU.

SKILLS

ROBLOX

Luau · Roblox Studio · RemoteEvents / Functions · ModuleScripts · Client-server model · ScreenGui / TweenService · ParticleEmitter / Beam VFX · Animation

AI TOOLS

Claude / Claude Code · ChatGPT · Spec-driven prompting · AI code review · Team leadership

OTHER

C# / Unity · TypeScript / Next.js · JavaScript · Git / GitHub · Networking (TCP)

EDUCATION

VIETNAM–KOREA UNIVERSITY OF ICT (VKU)

Information Technology · 2023 – 2028

GPA: 3.0 · English: intermediate

ACHIEVEMENTS

Bronze Medal – Central & Central Highlands Informatics Olympiad (2022)

Third Prize – Young Informatics Contest (2022)

Third Prize – Young Informatics Contest (2021)

Expected salary

12,000,000 – 15,000,000 VND / month (gross)

Full-time, remote · negotiable

ROBLOX EXPERIENCE

2021 – present

AOT: WINGS OF FREEDOM

Founder & Lead Developer

- Lore-based permadeath roleplay with 4 military branches. **146,416 visits**; 540 members across the main and Trainee Corps groups.
- Multi-place universe (Trost, Wall Maria, Shiganshina, Stohess, supporter place); ODM gear and Titan shifter systems.
- Lead a team of scripters, modelers, animators and UI designers. Currently private while the old-engine build is updated for Roblox's new rules.

2021

AEROSPACE STUDIO

Founder · 203 members

- AOT free-play: **47,896 visits, 80% likes**; open-world titan hunting with ODM gear and an auto titan spawner.
- Aerospace Shippuden (Naruto-inspired): 92% likes. Sword Art Online project in development.

2025 – 2026

COMBAT & ARENA SYSTEMS

- Data-driven spells (class, mana, cooldown) validated on the server via RemoteEvents; Health/Mana HUD and loadout UI.
- Round-based FFA with map rotation; crate unboxing, specials, trade tab and level/XP; client-side ability VFX.

AI-ASSISTED WORKFLOW

Spec the feature → generate focused modules with Claude/ChatGPT → review every line (server-side remote validation, connection cleanup) → multi-client play-test in Studio → profile with MicroProfiler. I own gameplay logic, security and quality.

OTHER EXPERIENCE

- **Sealand Property** (2026 – present): real-estate web platform, search filters, EN/VI, booking.
- **Unity Game Dev, VKU** (2026): C# gameplay labs and ShaderLab shaders (GitHub).
- **TCP Server** (2025 – 2026): raw-socket, multi-client server.
